

Safety instructions - English

Table fireplace 'Burn' and table fireplace 'Fireplace'

This product information must be read carefully before using this Philippi product and kept for future reference.

Do not leave burning oil lamps unattended

Warning:

This product contains lamp oil in its ready-to-use form and must be kept out of the reach of children. The supplied funnel with extension and its lamp oil storage container must also be kept out of the reach of children.

Warning:

Even a sip of lamp oil - or even sucking on the wick - can cause life-threatening lung damage in small children.

Warning:

If lamp oil is swallowed, do not induce vomiting and never give water. Seek medical attention immediately or contact a poison information centre and show these warnings.

Caution:

Wicks may only protrude 1 mm from the hole in the wick holder. The maximum filling quantity of the container of 800 ml must not be exceeded. Only light the oil lamp if it is standing horizontally and securely. Do not move the lit oil lamp. There is a small air hole in the side of the tank. Do not tilt the filled oil lamp, otherwise oil could escape.
